## Bim Willow Anything Class

In these classes, Bim will teach the basics of building with natural materials. Many of the designs are historical and true Americana. Items not listed may be built in class. All ideas and dreams welcomed -- call for a quote.

Completed projects will be ready to take home within the times estimated, which are based on no experience.

Students are required to bring a hammer (8 oz. is best for willow works; 16 oz. hammer to build the frame) & pruning shears. A limited number of loppers and wire cutters will be available to share, but if you have them, bring to class.

Advance registration required with project(s) choice so that materials can be collected.

Call 715/386-2305 or go to [www.ThePhipps.org](http://www.ThePhipps.org) to register!
